PROFESSIONAL SUMMARY

Software engineering professional with experience developing and designing full-stack applications using modern web technologies. Strong interest in continuous learning and using new tools to improve products and processes. Focused on producing valuable user outcomes through user-centered design.

SKILLS

Languages & Tools: Amazon Web Services, Claude Code, CSS, Docker, Git, Java, $\text{\LaTeX}$, Linux, Neo4j, React, Spring, SQL, TypeScript

Practices: Agile Software Development, Continuous Integration, Extreme Programming, Test-Driven Development, User-Centered Design

WORK HISTORY

Aug 2024 – Current **Senior Software Engineer**

Rise8 | Remote

- Developed Risk Management Framework platform for simplifying and streamlining the continuous authority to operate (cATO) process.
- Leveraged Claude Code to recover failing deployment environments and codify configurations in Terraform

Feb 2024 – Aug 2024 **Software Engineer (SkillBridge Intern)**

Sagely | Remote

- Built a social learning platform to guide users' personal and professional learning journeys, using TypeScript, React, and TailwindCSS.
- Integrated OpenAI's GPT using LangChain and Jina Reader to organize, curate, and contextualize user content
- Ensured feature parity on both web and mobile applications to create a consistent user experience

Jan 2022 – Feb 2024 **Full-Stack Software Engineer**

United States Space Force | Los Angeles, CA

- Developed and sustained two full-stack applications, using TypeScript, React, Kotlin, and Spring, to modernize satellite management for 1200+ global users
- Transitioned two applications from Cloud Foundry to Azure Kubernetes Services as tracers for new deployment pipeline and environment
- Led scoping of project to allocate satellite resources from multiple locations, at the request of the USSF Chief of Space Operations

EDUCATION

May 2019

Bachelor of Science: Computer Engineering

Rochester Institute of Technology | Rochester, NY
